

Regarding HB 5285

Dear Gentlepersons:

I am writing in support of HB 5285. I am a Connecticut parent and grandparent. My family members will no doubt live to witness and to be burdened with the negative effects of climate change. Teaching climate change will enable them and all Connecticut children to understand the causes and work most effectively in the mitigation of global climate change. We must prepare the citizens of this challenging future!

Please do not delay the approval and passage of this bill. The time to act is now. It is our duty to do all we can.

Sincerely,

Paul Sanderson
